

This Special Issue of the Journal of STEM Education: Innovations and Research is the first in a series of Special Issues featuring results from research conducted for the Laboratory for Innovative Technology and Engineering Education (LITEE) Case Study National Dissemination Project. This project is conducted under contract no. DUE # 0442531, funded by the National Science Foundation since 2007. Russell Pimmel, Ph.D., Program Director, Division of Undergraduate Education, has served as the NSF Program Officer. We thank him for his support of this project. The LITEE Case Study National Dissemination Project is led by P.K. Raju (Department of Mechanical Engineering, Auburn University), serving as the Principal Investigator (PI), and Chetan Sankar (Management Department, Auburn University), serving as the Co-Principal Investigator. Any opinions, findings, conclusions, and recommendations expressed in these articles are those of the author(s) and do not necessarily reflect the views of the National Science Foundation.
