Read what our authors have said about their experiences.

“Everyone from JSTEM was helpful and the feedback we received on our manuscript helped us craft a stronger and more clear final paper. I am excited to share what we have learned from the SUPER program with others.”

“Our experience working with JSTEM has been positive and constructive. The journal provided a platform for sharing our research findings on the impact of 3D models on student learning in engineering courses, and we appreciate the opportunity to contribute to the advancement of STEM education through this publication.”

*“Overall, they were open to a different style of journal article and supportive to publish innovative ideas.”
“JSTEM’s reviews were smooth, timely, honest, and straightforward to use. The website doesn’t have any annoying bells and whistles, and we will definitely be back!”*

“It was a great experience, because the editorial team was organized, knowledgeable, encouraging, and professional. They kept the project moving forward in order for us to meet our scheduled deadlines. They offered suggestions when we faced unexpected challenges, plus they were available and responsive from beginning to end of the project. The end result exceeded expectations and that’s much appreciated!”

“JSTEM was great to work with- the timeline for review and revision was reasonable and clear and my questions were addressed quickly.”

“The process of publishing has been very smooth. Communication from staff was always productive throughout the process.”

“We had a positive experience with JSTEM. Our work was quickly reviewed. The time from submission to publication was only 4 months.”

“We appreciated the journal’s emphasis on including photographs and figures. We were able to include a photo that depicted the process of developing a pathway model. Most academic journals would not want to include such a photo.”

“We had a wonderful experience with JSTEM. The suggested improvements and critiques were helpful to improving our article. The JSTEM team really helped with flexibility and bringing our publication to fruition. The process was relatively seamless.”

“It was great, although it took a little longer the quality of the review was great and we learned a lot through the reviewer feedback.”
